

DSP Programming Services

February 17, 2022 - SYMCO, Inc Announces the Launch of Their First Professional Service Offering: **DSP Programming Services**

In order to aid our integrator partners in providing top-quality DSP projects, Symco is launching "DSP Programming Services".

This new offering will utilize engineers and programmers with dozens of years of experience with Biamp's DSPs, and will provide our partners with a valuable option in outsourcing when they need to scale to meet a certain project's deadline, or need to add specialized and proven DSP programming capabilities.

Symco's President, Frank M. Culotta commented, "When offloading your Biamp DSP Programming needs to a sub-contractor, it's vital that your sub is an expert.

Symco has been Biamp's Independent Rep for over 10 years and has influenced, de-signed, and help facilitate thousands of projects utilizing Biamp's Industry-leading DSP. Our highly experienced team specializes in Biamp DSP...so if you must outsource your DSP Programming, you can rest assured that you are partnering with a team that is second to none.

Vince Veneziale, Symco's Field Sales Engineering Manager added, "As we continue to try and find new ways to bring value and success to our partners our new DSP pro-gramming offering is just another way we can help our integrators to be successful and profitable in deploying the Biamp ecosystem "
